

Pework Cloud Migration Canvas

Created by  A4BEE
www.a4bee.com

Use this Pework Cloud Migration tool
to prepare your organisation
for the journey to the cloud.

Check legal regulations

Engage
Legal & Compliance Officer

List "must have" and "nice to have" regulations which are relevant for your business:

MUST HAVE

NICE TO HAVE

Skills

Engage
HR and Procurement

Hire versus buy - decide which cloud related skills are worth developing in-house; and for which the best decision would be to cooperate with partners.

KEY CLOUD SKILLS:

Cloud Platform

Microservices

Serveless Application Programming

API

Databases (SQL / noSQL)

DevOps

Cloud Security

INTERNAL
OUTSOURCE

Identify and assess your needs

Check up
your strategic objectives

List key strategic / business goals and check if moving into the cloud can improve their realization, with short YES or NO:

	YES	NO
	YES	NO
	YES	NO
	YES	NO
	YES	NO
	YES	NO
	YES	NO
	YES	NO

Estimate costs

Engage Finance and Controllers

While planning cloud budget don't forget to include the following costs:

OPEX ← Estimated → **CAPEX**

Cloud service usage (based on provider pricing model)

Data storage

Data transfer

Trainings / Skills development

Additional professional / implementation services

IT Security & Data standards

Engage Security Officer

List IT security and data related standards together with compliance requirements, e.g. ISO, COBIT, ITIL, NIST, GDPR, SOC, HIPAA:
